

WOOD AND
LAMINATES
ADHESIVES

FRABOADESIVI

PRESSION VOT (SOLVENT)

One-component or two-component polichloroprene-based adhesive with excellent spreadability, good yield, and good thermal resistance. A superior type product suitable for difficult bonding of wood/laminates to themselves and metal.

RESPAN PLR AT (SOLVENT)

Polichloroprene spray adhesive. Excellent yield and high thermal resistance.

Excellent sprayability. Superior product suitable for difficult bonding of wood and laminates.

RESPAN PLR (SOLVENT)

Sprayable polichloroprene-based adhesive with good thermal resistance and long open time. The product is available in red and straw color.

PRESSION PK/E (SOLVENT)

Polichloroprene-based adhesive with good spreadability, suitable for various bonding of wood/laminates and related materials to themselves.

PRESSION UNIVERSAL ADHESIVE (SOLVENT)

Polichloroprene-based adhesive for difficult bonding of plastic laminate profiles, wood, metal, leather, cork, etc., with good thermal resistance. Suitable for brush application.

PRESSION HM/180 (SOLVENT)

Acetovynil-based adhesive particularly suitable for bonding profiles and embellishments to wooden furniture. Excellent adhesion even on glossy wood. Ideal for "do it yourself" projects for bonding leather, wood, fabric, glass, cardboard, etc. Rapid drying, transparent color, and packaged in 200g and 500g bottles with a spout.

PRESCOL R (WATER)

Rapid-type vinyl adhesive with a totally transparent film.

PRESCOL PL/2 (WATER)

Normal-type vinyl adhesive with good yield and bonding power.
